

Hire Ukrainian Developers

Trusted Technology Partner

About Us

Our team gives you an access to the top IT talents in the world which Ukraine is famous for.

Software developers, architects, QA engineers, PMs – all these specialists can become a part of your extended team or build up a separate offshore team to ensure true value for your business.

**IT
recruitment**

**Talent
acquisition**

**Onboarding
and retention**

**Project
management**

**Accounting and
legal support**

**Control
performance**

Our Expertise

We build and cultivate dedicated teams of professionals, based on your exact requirements.

Why Ukrainian Developers

3\$ billion market

Ukraine can **double the market size** by 2020

In the **top 50** of the World's Most Innovative Economies (Bloomberg 2017)

PwC ranked Ukraine 5th **among Top 25 IT service exporters**

Ukraine was included in Gartner's list of **top 10 emerging-market** locations for offshore services

According to Colliers international, Ukraine has **the 4th largest number of IT professionals globally**

Services: Dedicated Developers

A few dedicated developers working exclusively for you in our office. You can easily extend your team, save costs and set up a full offshore development center in the future. We get things done on schedule while you maintain control. If you want to decrease the number of dedicated employees, it's also very easy.

-  Team extension
-  Long term development
-  Ongoing bug fixes & support

What is included?

Recruiting

Legal support

Employee onboarding

Employee retention

Insurance

Office facilities

Employee perks and benefits

Shape communication

Trial period

Performance reviews

Social security payments

How Does It Work?

1 Analysis

Thorough analysis of needs together with HUD

2 Screening

We will put forward suitable candidates within 2 weeks after initial screening

3 Evaluation of candidates

Together we interview and perform technical tests with selected candidates, and then move forward based on your choice (s)

4 Trial period

We start up a trial period to try out your team and the cooperation in practice

5 Management & monitoring

Together, we shape communication flows per your needs and do performance reviews and take the temperature on the team

6 Long term strategy evaluation

We help you evaluate future needs and are ready to scale and make adjustments

What Do You Get

Dedicated engagement model

Each programmer you hire works solely on your project from our office

Guaranteed confidentiality

Signing an NDA is a must for us. After delivery, you get all intellectual property rights for the apps

Scale team easily

Use our pool of 5000 + qualified tech candidates to build and manage the best development teams

Up to 50% cost reduction

You invest less due to our transparent business model and hiring developers in Ukraine

Why Are We Different

+ IT Recruiters

HUD has a qualified team of internationally certified IT Recruiters and HR professionals with more than 10 years of experience in the IT market

+ Supervision process

You get an account manager who takes care of all your concerns and reports you

+ No hidden costs

You are aware of the salary your developers earn, so you can manage bonuses and pay rise directly

+ Hiring Transparency

Interview final candidates by setting Skype calls or arranging personal meetings in our office

Your recruiting demand is sky-high but you don't want to spend fortune on hiring additional recruiters.

To develop a Poc or MVP, you need to relocate developers from other projects.

Recruiting and HR is not what you want to focus at the moment, but you need to hire a team quickly.

There are no good developers left available in your location and you are having hard times headhunting.

You have ideas for new features or projects, but don't want to defocus your core team.

Your development needs are growing, but your IT budget stays the same.

Trusted Technology Partner for Various Companies

We recommend:

- Extended Team
- Turnkey R&D Center

Frequently Asked Questions

What is the cost

The price will include the following elements: developers salary, tax and HUD service fee.

HUD service fee depends on service you choose and team size you need. Contact us directly to get a proposal with an accurate price.

What if we want to replace a developer in a dedicated team due to some reason

Your team will use the system of your choice. If you have an in-house team, you can connect your new remote developers to it. If you set up an offshore dedicated center, you can use any tracking system you decide.

Our Clients

Larry Organ, Exact Data

Over the past 8 years, we have worked on hundreds of different projects.

Their team offers quick turnaround times, high quality work, and brings innovative ideas to the table. They have built programs which are now the backbone of our organization and continue to help us grow. ”

Rick Coomer, IDARick

The team has been my “go-to” for site redevelopment including front end migration to WordPress and back end Symphony integration, upgrades and mods. I have absolute faith in Arthur and team for development and support. An added bonus is that they are cost effective as well. Would highly recommend if you are considering “offshore”. ”

Ben Peskoe, Sierrainteractive

I have hired Hire Ukrainian Developers more than a dozen times over the past 6 years to work on small and large programming projects and have never been disappointed. Arthur and his team are skilled, reliable and trustworthy and do excellent work. They are willing to see projects through from start to finish and complete even the small details. ”
